

For Immediate Release: August 15, 2023

**#30129 Apex2 Sport, Datsun 620 RTR**  
**#30129C Apex2 Sport, Datsun 620 RTR LiPo Combo**

**ELECTRIC ■ ON ROAD ■ 1:10 SCALE ■ 4 WHEEL DRIVE ■ RTR**

Team Associated's new Datsun 620 truck is a highly detailed and fun-to-drive Ready-to-Run RC car. Built on a budget-friendly Apex2 Sport chassis, the Datsun 620 features some of the latest features in racing. A front and rear independent suspension with coil-over shocks and active rear toe give the Apex2 Sport the ultimate in handling on uneven tarmac. This makes it a perfect platform for the 1:10 scale Datsun 620!

**A 1970s Japanese classic truck**

The Datsun 620's unusual flowing lines have inspired many tuners over the years. One undeniable factor of its design is the flexibility of being able to provide a blank canvas for any type of build. Workhorse, hauling, racing, commuting---it could do it all. Unlike other pickups during this time period, one key ingredient is their availability. This might be accredited to their superior build quality. Another factor could be the small innovations introduced throughout its lifespan.

Team Associated is proud to offer an officially licensed Datsun 620 in 1:10 scale form for the Apex2 Sport chassis. This superbly designed single-piece polycarbonate body features a highly detailed decal sheet, injection-molded fender mirrors, windshield wipers, and spoiler. Modeled after wheels from that era, the 1.9 bronze-colored turbine-style rims are the perfect fit on this realistic-looking Datsun 620.

The **#30129C LiPo Combo** has the added benefit of a Reedy Compact Balance Charger and Reedy LiPo battery pack included!

# HIGHLIGHTS

## APEX2 SPORT

For better handling, A-arm front and rear independent suspension keeps the Apex2 chassis under control during the closest of racing conditions

Coil-over shock absorbers smooth out the bumps when ripping around the track

The Apex2 Sport comes equipped with Reedy SC500X programmable brushed ESC (program card sold separately) with T-plug connector and Reedy's 550 15-turn 3-slot motor

Redesigned chassis layout allows for either a shorty or standard battery configuration to be used for maximum performance or runtime

Active rear suspension allows the amount of toe change to be adjusted through the suspension cycle, increasing or decreasing rear grip

A sealed center driveline keeps dirt and debris out for smooth and reliable power delivery

Injection-molded brake calipers and rotors give the Apex2 Sport chassis scale looks

*Due to ongoing R&D, photos may not match final vehicle. Vehicle shown on these pages equipped with items NOT included in #30129: Reedy battery.*

## MORE FEATURES

- Steel dogbone set and drive axles
- Sealed front and rear gear differentials
- Adjustable hook and loop battery straps
- Injection-molded brake calipers and rotors
- Aluminum motor plate
- Adjustable shock mounting locations
- Bolt-on steering plates
- Molded one-piece tie rods and steering links
- Adjustable body post height locations
- Plastic tub main chassis
- POM-filled injection molded pivot balls
- Oilite bushings

## SPECIFICATIONS

Scale	1:10
Power	Electric
Length	458mm (")
Width	190mm (")
Weight	Varies
Wheelbase	259mm (")
Transmission Ratio	2.6:1

## ITEMS NEEDED TO COMPLETE

- **#30129, 30129C:** Four AA batteries for radio
- **#30129:** Suitable 6-cell NiMH or 2S or 3S LiPo battery with T-type connector for vehicle
- **#30129:** Charger suitable for chosen battery
