#70036, 70036C

ELECTRIC ▪ ON ROAD ▪ 1:10 SCALE ▪ 2 WHEEL DRIVE ▪ RTR

Now with a new Pro Reakt body featuring the iconic Lucas Oil brand!

Street Racing – An unsanctioned form of auto racing which occurs on public roads. Racing in the streets is centuries old and started well before the automobile, but auto racing started the moment the second vehicle was created!

Modern street racing's roots go back to Woodward Avenue, Michigan in the 1960s when the three main Detroit-based American car companies were producing high-powered performance cars. A private racing venue was not always available, and therefore the race would be held illegally on public roads.

Based on the 9-time R.O.A.R. Short Course National Championship platform, the DR10 Drag Race Car features a water-resistant high-power Reedy brushless speed control and 3300kV brushless motor, a 2.4GHz 2-channel radio system, as well as our DVC (Dynamic Vehicle Control) receiver unit with built-in adjustable digital gyro. Add to that a Reedy metal-gear, digital, high-torque servo and a water-resistant enclosed receiver box.

In addition to the #70036 features above, the **#70036C Brushless LiPo Combo** includes a #27201 Reedy Compact Balance Charger and #751 Reedy 7.4V 2S LiPo Battery with T-plug.
