RC10T6.2 Team Kit

#70003

ELECTRIC ■ OFF ROAD ■ 1:10 SCALE ■ 2 WHEEL DRIVE ■ KIT

Race-winning heritage. Based on Team Associated's RC10B6.2 platform, the RC10T6.2 Team Kit represents the next step in the evolution for competitive truck racing. The RC10T6.2 Team Kit is the next iteration of the successful truck platform bringing updates to improve adjustability, durability, and most importantly, performance. The engineers behind the doors of Team Associated's Area 51 incorporated the updates racers like you asked for and included more tuning option parts in the box.

Designed to win. The RC10T6.2 shares key components with the RC10B6.2, RC10B6.2D, and RC10B74.1 Team Kits, making it easier than ever to run multiple classes at the same time. Like the RC10B6.2 and RC10B74.1, the RC10T6.2 has new features such as an integrated fan mount, highly adjustable rear hub assembly, and the speed, durability, and lineage expected of a true champion.

The RC10T6.2 has been designed and built to the highest standard to give racers an edge over the competition.

HIGHLIGHTS

RC10 T6.2 TEAM KIT

V2 12mm Big Bore threaded aluminum shocks with 3mm shafts, machined pistons and X-rings for improved smoothness

Both Laydown and Layback Stealth transmissions included for tuning weight bias

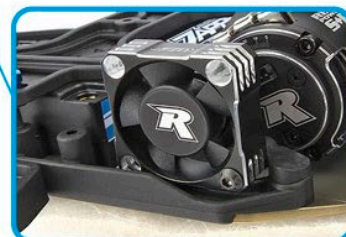

B74.1 two-piece rear hubs with aluminum upper caps for fine geometry adjustments

Easy-access differential with height adjustment using included 0, 1, 2, and 3mm inserts

Factory Team 13g aluminum chassis weight

Updated side rails for 30mm motor fan mount shared with B6.2 buggy

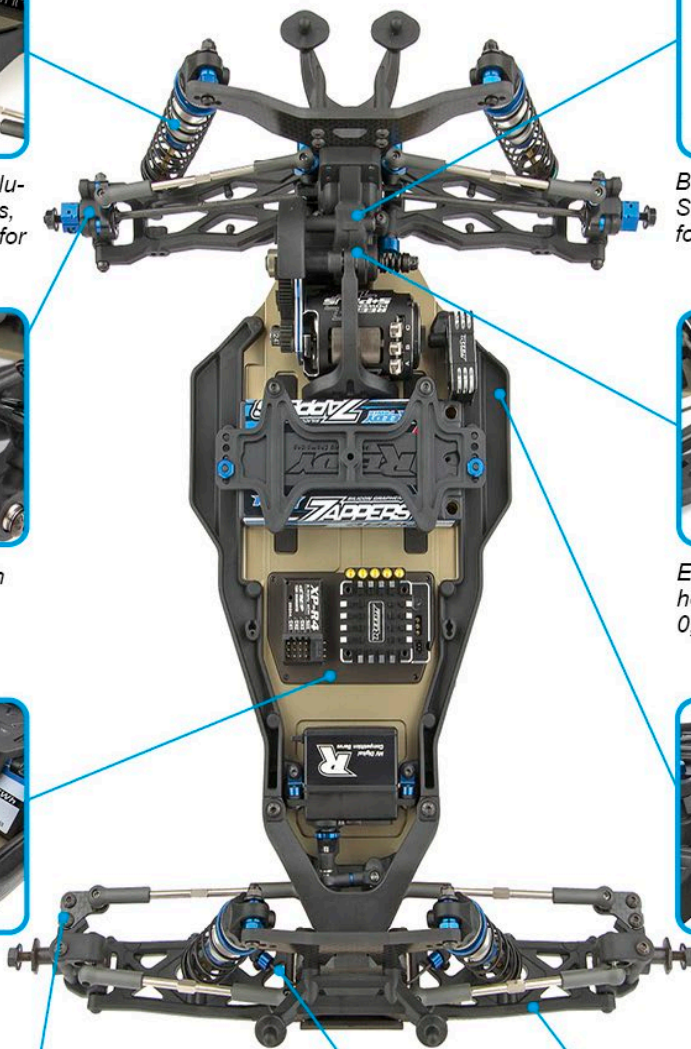

+1 carbon fiber steering block arms

1.3mm front anti-roll bar and hardware included for added high-speed stability

New gull wing front and rear arms and carbon fiber shock towers for improved high traction handling

Due to ongoing R&D, photos may not match final kit. Vehicle shown on these pages equipped with items NOT included in kit: Reedy motor, batteries, ESC, servo, receiver, wheels, tires, and pinion gear. Assembly and painting required.

MORE FEATURES

New Features

- New gull wing front and rear arms and shock towers for improved high traction handling
- B74.1 two-piece rear hubs with aluminum upper caps for fine geometry adjustments
- 1.3mm front anti-roll bar and hardware included for added high-speed stability
- Both Laydown and Layback Stealth(R) transmissions included for tuning weight bias
- Factory Team 13g aluminum ESC tray
- Updated side rails for 30mm motor fan mount shared with B6.2 series buggies
- +1 carbon fiber steering block arms
- B74 66mm rear axles and 91mm CVA bones
- 8.5mm aluminum rear clamping hexes with laser etching
- Updated front body mount is more rigid to protect body from cracking
- Standard weight 1.0mm Pro-Line(R) Enforcer body included

Legacy T6.1 Features

- Lightweight, hard-anodized aluminum chassis with centralized mass and three mid-motor positions for improved handling on all track types
- Differential height adjustment with included 0, 1, 2, and 3mm inserts
- Easy access to differential
- Split slipper assembly for better weight balance and shock clearance
- Heavy-duty routed 4.0mm carbon fiber shock towers
- V2 12mm Big Bore threaded aluminum shocks with 3mm shafts and X-rings for improved smoothness
- Machined pistons included for better fit and smoother operation
- Reverse bellcrank steering allows more room for mounting electronics
- Bolt-on steering block arms for easy Ackermann adjustments
- Aluminum rear ballstud mount for added strength
- One-piece shock bushings to make assembly easier
- Lightweight aluminum top shaft
- Aluminum C and D arm mounts included for large range of anti-squat and toe adjustments
- Factory Team upgraded ball bearing kit included
- Heavy-duty ball cups and ballstuds allow for maximum suspension travel while reducing bind and friction

SPECIFICATIONS

Scale	1:10
Power	Electric
Length	368mm (14.50")
Width	varies*
Weight	varies*
Wheelbase	288-290mm (11.33-11.41")
Transmission Ratio	2.60:1

*Actual width and weight will vary depending on the electronics, and other components used in the finished kit.

ITEMS NEEDED TO COMPLETE

- 1:10 scale 540-size electric motor (Reedy Sonic line recommended)
- 1:10 scale electronic speed control (Reedy Blackbox #27002, 27003, 27004, 27005)
- 2-cell LiPo battery pack (Reedy #27818)
- Battery charger
- 2-channel surface transmitter, and its batteries
- 2-channel receiver
- Steering servo (Reedy servo #27107)
- Pinion gear (48 pitch)
- Spray paint for polycarbonate body
- 1:10 scale 12mm hex truck wheels (#7852, 7853)
- 1:10 scale truck tires and foam inserts
