

LIMITED EDITION KIT!

The prototype RC10 (right) and the full-size off-road buggy that inspired Roger Gault for the design and box art.

Due to ongoing R&D, photos may not match final kit. Vehicle shown on these pages equipped with items NOT included in kit: Reedy motor, battery, ESC, servo, receiver, and pinion gear. Assembly and painting required.

Full race rear suspension includes durable dogbone and stub axle drivetrain with pinned modular wheels. Quick release knockoff design provides fast, accurate alignment. Low profile gearbox uses VariLok adjustable diff and is protected by an integrated motor/heat sink.

Independent suspension with coil-over shocks help smooth out the bumps. Precision molded nylon suspension components can be easily custom color dyed. A-Arm/Ball joint design permits static camber, camber rise, caster, ride height and spring rate tuning to suit every type of track.

SPECIFICATIONS

Scale	1:10
Power	Electric
Length	381mm (15")
Width	226.8mm (8.93")
Weight	Varies
Wheelbase	267.7mm (10.54")
Transmission Ratio	1.83:1

ITEMS NEEDED TO COMPLETE

- 6-cell NiMH or 2S LiPo for radio-controlled car
- Radio control battery charger
- 1:10 scale radio control electronic speed control
- 1:10 scale 540-size electric RC car motor
- 2-channel RC surface transmitter and its batteries
- 2-channel receiver
- Pinion gear
- Paint for the body
- Steering servo
- Recommended: Glue for tires and wheels
