

For Immediate Release: August 15, 2023

## New! RC8B4 Suspension Arms in new Medium Blend Composite Material

Team Associated developed a new Medium composite arm material for 1:8 off-road racing. Compared to the RC8B4 kit Hard material, the Medium arms have reduced fiber content which offers several improvements. Medium arms are marked with a blue dot on all parts.

### Benefits of Medium arms:

- Increased impact strength while maintaining responsive racing feel
- Increased durability in cooler temperature range
- More grip on low traction conditions where added flex makes the car more forgiving
- Slightly reduced weight of approximately 1.5 grams per arm

#81593 RC8B4 Rear Suspension Arms, medium

Fits: RC8B4, RC8B4e.
